Professional Summary

Java Developer skilled in Java, JSP, Servlet, JDBC, SQL, and Spring Boot with strong understanding of OOP, SDLC, MVC, and REST APIs. Experienced in building API-driven backend systems and scalable enterprise architectures. Strong communication, analytical thinking, and ability to contribute effectively in agile product teams.

Technical Skills

Core Java & JEE: Java, JSP, Servlet, JDBC

Frameworks: Spring Boot, MVC Architecture, REST API Development

Web Tech: HTML, CSS, JavaScript, React.js, AJAX, JSON

Database & Query Language: MySQL, SQL

Generative AI & ML: OpenAI API, Prompt Engineering, NLP Automation, LLM Integration, Python Microservices, BERT Intent Detection, SHAP, LIME

Tools: Git, GitHub, Maven, VS Code, Postman

Concepts: OOP, SDLC, Data Structures, UML, Design Patterns

Soft Skills: Communication, Logical Thinking, Team Collaboration

Experience

Deloitte Technology Job Simulation — Virtual Experience

Nov 2025

Forage (Remote)

- Completed Deloitte's tech consulting simulation involving coding, architecture design, and client-use-case analysis.
- Improved client communication, technical documentation, and structured problem-solving.
- Practiced SDLC workflows, requirement analysis, and solution planning.

Projects

Occasion Message Generator – AI Message Creator

Oct 2025 – Present

- Built an AI-driven message generator using Spring Boot, React.js, and OpenAI API.
- Integrated NLP-based templates and sentiment-aware message personalization.
- Connected MySQL database for storing user inputs and message history.

GenAI-Driven Java Framework for Personalized Customer Experience in E-Commerce

Jan – Sep 2025

- Designed and implemented a hybrid Java + Generative AI framework to deliver real-time personalized product recommendations using NLP, sentiment analysis, and conversational AI models.
- Built a full-stack e-commerce system (ANUFA) with authentication, cart, orders, and product management using Spring Boot, React.js, and MySQL.
- Integrated Java–Python microservices for intent detection (BERT), churn prediction (Logistic Regression/XGBoost), and explainability (SHAP/LIME).
- Orchestrated scalable request handling through a Java-based API layer and deployed both frontend and backend.
- Achieved major performance gains in simulation: +38.4% user engagement, +39.3% conversion rate, +35.2% revenue/visitor, +15% retention, and +23% ROI.

Paper Acceptance: Accepted at IEEE ETCOM 2025 (Paper ID: 2178), titled “GenAI-Driven Java Framework for Personalized Customer Experience in E-Commerce.”

Education

Bachelor of Engineering in Computer Science – Chandigarh University

Session: 2022–2026 — **CGPA: 7.42**

Class XII (CBSE) – St. Paul High School, Hajipur

Session: 2020–2022 — **Percentage: 73.16%**

Class X (CBSE) – St. Paul High School, Hajipur

Session: 2019–2020 — **Percentage: 86.66%**

Certifications & Achievements

- [Data Analytics Essentials](#) — Cisco (2025)
- [Java Full Stack Developer](#) — Board Infinity (Feb 2025)
- [SQL: A Practical Introduction](#) — IBM (Jul 2025)
- [Academic Class Representative](#) (2024–2025)
- [ReactJS Certification](#) — Infosys Springboard (Jun 2024)
